Reference #1 - Eco-Friendly Purchasing Guidelines

Purpose

The purpose of these guidelines is to minimize the environmental impact of buyer's purchasing activities as part of the buyer's sustainable business efforts.

Guidelines

Purchase eco-friendly products whenever possible.

It is preferable to purchase products and services that satisfy eco-friendly standards established by the government and widely known organizations.

Prioritize products that fulfill requirements for function, quality, and economic feasibility while having less environmental impact in all steps of production (i.e., energy consumption, waste production).

If the purchased item has a significant negative impact on the environment, encourage continuous improvement through partnerships with suppliers.

Through the MSDS, confirm whether environmentally harmful substances and prohibited substances are used and identify the environmental risks in advance.

When evaluation is possible, consider efforts to save resources and eco-friendly design (e.g., miniaturization, lightweight) and materials when making purchases.

Prioritize products that are made with recycled materials or parts, or products that use recyclable materials.

Prioritize selection of products that clearly display information on the hazards or dangers associated with the environment, safety, and health, and that disclose the details in a transparent manner.
